CONTENTS OF VOLUME THIRTY-TWO

NUMBER 1. *Human Malformations*

Scientific Editor: C. L. BERRY

		PAGE
Introduction	*Thomas McKeown*	1
Antenatal detection of fetal abnormality—physical methods	*John MacVicar*	4
Prenatal diagnosis of chromosome disorders	*K. M. Laurence & P. Gregory*	9
Prenatal diagnosis—chemical methods	*D. J. H. Brock*	16
Genetics of common single malformations	*C. O. Carter*	21
Environmental teratogens of man	*R. W. Smithells*	27
Some remaining problems in the reproductive toxicity testing of drugs	*C. L. Berry & Susan Barlow*	34
Surveillance of malformations	*Josephine A. C. Weatherall & J. C. Haskey*	39
Descriptive epidemiology of common malformations (excluding central nervous system defects)	*Ian Leck*	45
Model systems in teratology	*Felix Beck*	53
Mechanisms and pathogenesis of malformation	*David Poswillo*	59
Mechanisms of limb development and malformation	*L. Wolpert*	65
Congenital postural deformities	*P. M. Dunn*	71
Infective causes of human malformations	*J. A. Dudgeon*	77
Comparative aspects of infective malformations	*Cedric Mims*	84
Legal responses and the right to compensation	*Godfrey Carter*	89

Notes on Contributors 95

Book Reviews 97

NUMBER 2. *Immunological Tolerance*

Scientific Editor: D. W. DRESSER

		PAGE
Introduction	*J. H. Humphrey*	99
Transplantation tolerance	*L. Brent, C. G. Brooks, P. B. Medawar & Elizabeth Simpson*	101
Mechanisms in the acceptance of organ grafts	*R. Y. Calne*	107
Mechanisms of enhancement of kidney allograft survival: a form of operational tolerance	*J. R. Batchelor & K. I. Welsh*	113
Factors interfering with immunological rejection of tumours	*Robert W. Baldwin & R. Adrian Robins*	118
Self-tolerance and autoimmunity	*A. C. Allison & A. M. Denman*	124
Break-down of tolerance	*S. H. Leech & N. A. Mitchison*	130
Generation and selection of specific reactive cells by antigen	*John B. Hay & Bede Morris*	135
Mechanisms of B-cell tolerance	*G. G. B. Klaus, J. G. Howard & Marc Feldmann*	141
Tolerance induction as a model for cell differentiation	*D. W. Dresser*	147
Suppressor cells in humoral immunity and tolerance	*R. B. Taylor & A. Basten*	152
Suppressor T cells in cell-mediated immunity	*G. L. Asherson & M. Zembala*	158
Control mechanisms in delayed-type hypersensitivity	*J. L. Turk, L. Polak & Darien Parker*	165
Suppression of immunoglobulin formation with antibody against immunoglobulin	*B. Cinader & S. Dubiski*	171
Evasion of the immune response by parasites	*Bridget M. Ogilvie & R. J. M. Wilson*	177
Some reflections on principles and mechanisms of immunological tolerance	*J. H. Humphrey*	182

Glossary 185

Notes on Contributors 186

Book Reviews 190

NUMBER 3. *Haemoglobin: Structure, Function and Synthesis*

Scientific Editor: D. J. WEATHERALL

		PAGE
Introduction	*M. F. Perutz*	193
Structure and mechanism of haemoglobin	*M. F. Perutz*	195
Interaction of haemoglobin with protons, CO_2 and 2,3-diphosphoglycerate	*J. V. Kilmartin*	209
A model of co-operative oxygen binding to haemoglobin	*J. M. Baldwin*	213
The unstable haemoglobins	*J. M. White*	219
The mechanism and prevention of sickling	*A. May & E. R. Huehns*	223
Haemoglobins with altered oxygen affinity	*A. J. Bellingham*	234
Genetics of human haemoglobins	*A. Lang & P. A. Lorkin*	239
Direct measurement of the number of globin genes	*Robert Williamson*	246
Nucleotide sequences of globin messenger RNA	*N. J. Proudfoot & G. G. Brownlee*	251
Control of globin synthesis	*Tim Hunt*	257
Molecular basis of thalassaemia	*J. B. Clegg & D. J. Weatherall*	262
Management of thalassaemia major	*B. Modell*	270
Haemoglobin synthesis and cell differentiation	*John Paul*	277
Haemoglobin synthesis during human fetal development	*W. G. Wood*	282

Notes on Contributors 288

Book Reviews 290

INDEX TO VOLUME THIRTY-TWO

Names printed in capitals are those of authors who have contributed papers. Titles of books are printed in italics.

A

Alcohol, teratogenic effects, 27
ALLISON, A. C. & DENMAN, A. M.: Self-tolerance and autoimmunity, 124
Allum, N.: *Spina bifida: the treatment and care of spina bifida children*, 98
Amniocentesis, 9
— ethical considerations, 13
— future developments and problems, 14
Amniography, 6
Amnion cell culture, cytogenetic findings, 12
— — — indications, 12
— — — method and difficulties, 10
Amniotic cavity, shape in relation to prenatal deformation of fetus, 74
— fluid, chemical studies, 16
— — variables, measurement, 18
— — volume, relation to postural deformity, 73
Anaemia in thalassaemia major, treatment, 271
Anaesthetists, abortion in, 31
Anencephaly, and water calcium level, 32
— diagnosis in fetus, 5, 6
— due to blighted potatoes, 32
Anticoagulants, teratogenic effects, 30
Anticonvulsants, teratogenic effects, 27, 29
Antigens, binding by lymphocytes, 126
— generation and selection of specific reactive cells by, 135
— of parasites, 178
— release by organ graft, 114
— thymus-dependent, tolerance to, 143
— thymus-independent, tolerance to, 141
— transplantation, 107
— tumour-associated, 118
Anti-idiotype antibodies and tolerance, 104
Antilymphocyte globulin, 107, 109
Aqueduct stenosis caused by viruses, 87
Arteries, malformations, epidemiology, 48
ASHERSON, G. L. & ZEMBALA, M.: Suppressor T cells in cell-mediated immunity, 158
Authorship: *Writing scientific papers in English: an ELSE-Ciba Foundation guide for authors*, 98
Autoantibodies, formation by virus infection, 128
— induction against erythrocytes, 127
Autoantigens and immunological tolerance, 125
Auto-anti-idiotype immunity, development after organ graft, 114
Autoimmune response, suppression by T lymphocytes, 127
Autoimmunity and self-tolerance, 124
— genetic control, 125

B

B lymphocytes, functional heterogeneity, 124
— — in humoral immunity and tolerance, 152
— — replacement kinetics, 130
— — tolerance to, mechanisms, 141
BALDWIN, J. M.: A model of co-operative oxygen binding to haemoglobin, 213
BALDWIN, R. W. & ROBINS, R. A.: Factors interfering with immunological rejection of tumours, 118
BARLOW, S., *see* BERRY, C. L., 34
BASTEN, A., *see* TAYLOR, R. B., 152
BATCHELOR, J. R. & WELSH, K. I.: Mechanisms of enhancement of kidney allograft survival: a form of operational tolerance, 113
BECK, F.: Model systems in teratology, 53
BELLINGHAM, A. J.: Haemoglobins with altered oxygen affinity, 234
BERRY, C. L. & BARLOW, S.: Some remaining problems in the reproductive toxicity testing of drugs, 34
— & Poswillo, D. E. (editors): *Teratology: trends and applications*, 97
Biographical notes on contributors, 95, 186, 288
Biological standards: *Lists of international biological standards and international biological reference preparations 1975*, 190
Biparietal diameter and fetal abnormality, 7
Birth defects, prevention, causal mechanism studies, 63
Blood groups: *Blood group topics*, 291
— — *Blood groups in man*, 6th ed., 291
— — *The distribution of the human blood groups and other polymorphisms*, 2nd ed., 292
Brain, virus infections in animals, teratogenic effects, 86, 87
BRENT, L., BROOKS, C. G., MEDAWAR, P. B. & SIMPSON, E.: Transplantation tolerance, 101
British Pharmaceutical Codex Supplement 1976, 191
British Pharmacopoeia 1973: Addendum 1975, 191
BROCK, D. J. H.: Prenatal diagnosis—chemical methods, 16
BROOKS, C. G., *see* BRENT, L., 101
BROWNLEE, G. G., *see* PROUDFOOT, N. J., 251

C

CALNE, R. Y.: Mechanisms in the acceptance of organ grafts, 107
— *Organ grafts*, 190
Carbon dioxide binding to haemoglobin, 209
CARTER, C. O.: Genetics of common single malformations, 21
CARTER, G.: Legal responses and the right to compensation, 89
Cartilage development and limb abnormalities 68

INDEX TO VOLUME THIRTY-TWO

Cavill, I., Ricketts, C. & Jacobs, A.: *Computers in haematology*, 291
Cells, selection, mechanism of, 138
— specific reactive, separation and removal, 138
Cerebellar degeneration, granuloprival, in animals, 86
Chick wing bud, development, 65, 66
Child, damage in utero, 89
— *Handicapped child: assessment and management*, 98
Chondrogenesis and limb abnormalities, 68
Chromosome disorders, prenatal diagnosis, 9
Ciba Foundation Symposium: *Congenital disorders of erythropoiesis*, 291
CINADER, B. & DUBISKI, S.: Suppression of immunoglobulin formation with antibody against immunoglobulin, 171
CLEGG, J. B. & WEATHERALL, D. J.: Molecular basis of thalassaemia, 262
Club-foot, epidemiology, 49
Computers in haematology, 291
Contraceptives, oral, teratogenic effects, 30
Contributors, biographical notes on, 95, 186, 288
Cyclophosphamide, effect on lymphoid tissue, 166
— pre-treatment, effect on delayed hypersensitivity reactions, 166
Cytomegalovirus infection, congenital, 79
— — epidemiology, 80
— — pathogenesis, 81
— — sources of virus, 80

D

DENMAN, A. M., *see* ALLISON, A. C., 124
Deoxyhaemoglobin, salt bridges, 200, 217
Desferrioxamine in treatment of thalassaemia, 274
2,3-Diphosphoglycerate, haemoglobin interaction with, 209
Dodd, B. E. & Lincoln, P. J.: *Blood group topics*, 291
Domaniewska-Sobczak, K., *see* Mourant, A. E., 292
Down syndrome, descriptive epidemiology, 45
— — seasonal trend, 45
DRESSER, D. W.: Tolerance induction as a model for cell differentiation, 147
Drugs, adverse effects on reproduction, tests for, 34
— metabolism, interspecies differences, 35
— teratogenic, 36
DUBISKI, S., *see* CINADER, B., 171
Ductus arteriosus, patent, epidemiology, 48
DUDGEON, J. A.: Infective causes of human malformations, 77
DUNN, P. M.: Congenital postural deformities, 71

E

English: *A manual of English for the overseas doctor*, 2nd ed., 292
Enterovirus infections in pregnancy, effects on fetus, 82
Erythrocruorin, 198
Erythrocytes, early precursors, 277
— induction of autoantibodies against, 127
— precursors, morphologically identifiable, 278
Erythropoiesis: *Congenital disorders of erythropoiesis*, 291
— during fetal development, 282
— site, relation to haemoglobin synthesis, 284
Erythropoietin, action in erythroid maturation, 279

F

FELDMANN, M., *see* KLAUS, G. G. B., 141
Fetal defects, detection by use of sonar, 6
Fetography, 6
α-Fetoprotein, concentration in fetal abnormalities, 16
— maternal plasma concentrations, 18
Fetoscopy, 7
Fetus, abnormalities, antenatal detection by chemical methods, 16
— — — — — physical methods, 4
— development, haemoglobin synthesis during, 282
— indirect effects of maternal infection on, 84
— infection, comparative aspects, 85
— infective malformations, 85
— kicking and presentation, relation to congenital postural deformity, 74
— malformations, infective, 85
— plasticity and postural deformity, 72
— radiology, 5
Foot deformities, congenital, epidemiology, 49

G

Gal, E. & Gal, I.: *Human congenital malformations: the design of a computer-aided study*, 97
Gal, I., *see* Gal, E., 97
Globin genes, chromosomal arrangement, 241
— — measurement, 246
— — regulatory mechanism, 242
— messenger RNA, nucleotide sequences, 251
— synthesis, control, 257
— — — by metabolites, 260
— — co-ordination with haem synthesis, 259
GREGORY, P., *see* LAURENCE, K. M., 9

H

Haem, effect on haemoglobin structure, 199
— stereochemistry, 197
— synthesis, co-ordination with globin synthesis, 259
Haematology: *Computers in haematology*, 291
Haemoglobin, abnormal: *Abnormal haemoglobins and thalassaemia: diagnostic aspects*, 290
— — synthesis during fetal development, 284
— adult, genetics, 239
— allosteric mechanism, 207
— — model, 217
— change from fetal to adult type, 285
— dimeric, 196, 199
— embryonic, genetics, 241
— fetal, genetics, 241
— — hereditary persistence, 265
— genetics, 239
— *Haemoglobin, isoenzymes and tissue differentiation*, 290
— human, genetics, 239
— interaction with carbon dioxide, 209
— — with 2,3-diphosphoglycerate, 209
— — with protons, 209
— lamprey, 199
— monomeric, 196
— oxygen binding, 213
— sickle-cell, chemical modification to inhibit polymerization, 230
— — mechanism and prevention, 223
— — polymerization process, 228
— structure, 195
— — function and synthesis, 193–292
— synthesis and cell differentiation, 277
— — during human fetal development, 282
— — molecular biology, 280
— — relation to site of erythropoiesis, 284
— tetrameric, 199
— unstable, 219, 237
— — clinical presentation and diagnosis, 220
— — management, 222
— with altered oxygen affinity, 234
Handicapped child; assessment and management, 98
Hapten-specific help against unresponsiveness, 132
HASKEY, J. C., *see* WEATHERALL, J. A. C., 39
HAY, J. B. & MORRIS, B.: Generation and selection of specific reactive cells by antigen, 135
Heart, malformations, epidemiology, 48
